REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

In a cartridge for containing a fluent composition to be dispensed therefrom through an aperture of the cartridge, the cartridge comprising a one piece plastic moulding and having an integral dispensing nozzle the outlet of which forms the aperture, the body containing a piston for dispensing the fluent material by application of a fluid under pressure on the piston, and a cap at an end of the body opposing the nozzle, the cap having an integral fluid pressure connection by which the fluid pressure source can be connected to the cartridge to drive the piston, the inclusion of the cap being permanently sealed to the body providing the advantage of preventing refill of the cartridge and preventing atmosphere from reaching the fluent material (see specification page 8, lines 1-3) was not found or fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
